Now in the last, this is Billing page where I can add Billing .

Billing

Date : 25-4-2024
Time : 15:3:54

Customer Details
Name contactNo email address Gender

Product Details
Product Id Product Name Price Quantity Description

Name	Description	Rate	Quantity	Total
Iphone 13	4gb ram, 16 gb rom	140000	5	700000

Calculation Details
Total
Paid Amount
Returned Amount

In this I will search with the customer contact nu if it is there in the database then automatically all the customer details will fill extracting from database otherwise need to open customer page and add the customer,

Then after you can search the product by product name or product id and you can increase the quantity then after clicking on add it will add it to the database then then you can add a new product by searching on new product id (but you cant edit customer details) total will shown by it shelf you just need to fill paid amount given by the customer then enter then it will show returned amount then after when you click on the save then it will generate a pdf
